### PROJECT : 1

#### E-LEARNING COMPANY WEBSITE DESIGN

I have successfully completed the website design for an E-learning company. For my project, I designed an engaging homepage for an e-learning company, focusing on highlighting key features and courses. I developed an intuitive navigation system to ensure a seamless user experience from the homepage to course details. The project also involved selecting a harmonious color palette and typography that aligns with the brand image, ensuring clear and consistent communication throughout the site. Additionally, I documented the design choices, including color schemes, typography, and user flow, providing detailed explanations for each decision to support the overall design process.

### PROJECT : 2

#### MUSIC APPLICATION (MOBILE APP UI)

For my project, I designed a captivating homepage and an easy-to-navigate menu for a music application, ensuring users can explore various features effortlessly. I crafted an attractive interface for playlist management and a visually appealing music player with essential controls. The dynamic color scheme and immersive visual elements, such as icons and album covers, enhance the overall user experience. Additionally, I implemented smooth transitions and interactive elements to create a delightful and engaging interface. Finally, I documented all design decisions, including color choices and interactions, to provide a comprehensive overview of the design process.
